EDUCATION

Olin Business School, Washington University , St. Louis, MO, USA M.S. in Business Analytics (Financial Technology) Honors: Beta Gamma Sigma, Outstanding Student Award, Charles F. Knight Scholar	08/2023 - 12/2024 GPA: 3.96/4.00
Central University of Finance and Economics (CUFE) , Beijing, China B.S. in International Economics & Financial Risk Management	08/2019 - 06/2023 GPA: 3.84/4.00

RESEARCH EXPERIENCE

Empirical Corporate Finance

Research Assistant for Margarita Tsoutsoura (WashU Olin) Since 05/2024

- Developed a “skill” variable to quantify talented/skilled labor across industries, eventually evaluating the industrial impact of COVID-19 relief subsidies.
 - Constructed the variable by adapting established empirical methodologies to a unique dataset and time frame, resolving SOC coding inconsistencies and harmonizing classification standards.
 - Validated the variable by benchmarking industry rankings against existing literature, confirming its robustness in capturing labor heterogeneity and addressing structural discrepancies.
- Processed labor participation data to support research on fintech and labor economics.
 - Designed a semi-automated script to reconcile firm names from scraped data with company registration records, enabling analysis of fintech firm dynamics including transitions and M&A activities.
 - Enhanced job title classification for the investment banking sector by leveraging fuzzy keyword matching, DNN, and LLM APIs, achieving high accuracy and robust categorization across detailed job functions.
- Compiled a comprehensive review of corporate board gender quota laws for policy analysis.

Distinguishing LLM-Generated Texts Using Linguistic Dimensions

Research Assistant for Gerald Onwujekwe (WashU Olin) 01/2024 - 11/2024

- Investigated computational linguistic dimensions to differentiate LLM/human authorship.
- Conducted analysis using LIWC and customized linguistic dictionaries, identifying dimensions effective for classifying AI-generated texts with implications for financial research applications.

Effects of Development Initiatives on Foreign Direct Investment

Senior Thesis at CUFE 11/2022 - 05/2023

- Examined the impact of the Belt and Road Initiative on Foreign Direct Investment (FDI) across 60 countries, focusing on infrastructure improvements in transportation, energy, and education sectors.
- Conducted an event study using fixed-effect regression models, revealing that transportation infrastructure significantly increased FDI inflows, while energy and education investments had less pronounced effects, highlighting sector-specific influences.

Mechanisms and Impacts of China’s National Carbon Market on Emissions

Research Analyst at International Institute of Green Finance, CUFE 02/2022 - 06/2022

- Evaluated the effectiveness of China’s national carbon market in reducing CO₂ emissions, with a focus on pilot regions and the mechanisms driving emissions control.
- Applied the Synthetic Control Method and counterfactual models, identifying that robust oversight and quota systems in select regions enhanced reductions via energy efficiency, technological investments, and industrial restructuring.

Evaluating Corporate ESG Performance in the Diamond Industry

Research Analyst at International Institute of Green Finance, CUFE 02/2022 - 06/2022

- Assessed ESG challenges in diamond production, focusing on carbon emissions, biodiversity loss, labor practices, and conflict diamond regulation.
- Recommended sustainable practices, including cultivated diamonds and governance reforms, to enhance transparency, mitigate environmental impact, and strengthen social responsibility.

Modeling Sustainable Transformation of Global Food System

Contestant (Honorable Mentions) of Interdisciplinary Contest in Modeling

02/2021

- Developed models to evaluate global food system sustainability by analyzing production, distribution, and consumption patterns, integrating policy, technological, and logistical factors.
- Simulated transformation scenarios using Python and MATLAB, demonstrating that targeted policies can substantially reduce emissions and enhance resource efficiency, culminating in a strategic roadmap for sustainable practices.

PROFESSIONAL EXPERIENCE

China International Capital Corporation (CICC)

FICC Product Specialist

03/2023 - 06/2023

- Investment Research on CLO, ABS, & REIT: fundamental analysis, structuring, market analysis.

Capital Markets Intern

06/2022 - 12/2022

- Underwriting Support on Equity/Debt/Convertibles: risk modeling and assurance, market analysis.

China Merchants Securities

Investment Banking Intern

02/2022 – 06/2022

- Securitization Support: due diligence, quantitative modeling & analysis.

Ernst & Young (EY)

Wealth & Asset Management Consulting Assistant

12/2021 – 01/2022

- Research Support on AMC Digital Transformation: literature reviews and client presentations.

TEACHING EXPERIENCE

Teaching Assistant

Olin Business School, Washington University

- | | |
|---|------------------|
| • Advanced Financial Management (Undergraduate, for Margarita Tsoutsoura) | Spring 2025 |
| • Advanced Corporate Finance I - Valuation (Graduate, for Yaron Leitner) | Spring 2025 |
| • A/B Testing (Graduate, for Xiang Hui) | Spring 2025 |
| • Advanced Corporate Finance II - Financing (Graduate, for Yaron Leitner) | Fall 2024 |
| • Financial Markets (Graduate, for Yaron Leitner) | Fall 2024 |
| • Machine Learning (Graduate, for Durai Sundaramoorthi & Gerald Onwujekwe) | Spring/Fall 2024 |
| • Capital Market and Financial Management (Undergraduate, for Koray Sayili) | Spring 2024 |

OTHER EXPERIENCE

- Entrepreneurship - “Youxi” Secondary Ticketing WebApp
- Leadership - VP of Planning, CUFE Red Cross Society

COURSEWORK

- **Finance/Economics:** Corporate Finance Theory (PhD, Top of Class), Asset Pricing (PhD, A), Microeconomic Theory (PhD, A), Advanced Corporate Finance Sequence (A+), Econometrics, Macroeconomics
- **Quantitative:** Stochastic Processes, Probability and Statistics Sequence, Matrix Algebra, Calculus

SKILLS

- **Research Interests:** Corporate Finance, M&A, Financial Markets, Labor Economics
- **Technical Skills:** Econometrics, Machine Learning, Textual Data Analytics, Large-Scale Data Analytics.
- **Programming Proficiency:** Python, R, Stata, MATLAB, SQL, SAS, AWS, Hive, $\LaTeX$, WebDev
- **Languages:** Mandarin (native), English (TOEFL 117/120, GRE 165V / 170Q / 5W), French (conversational)
- **Communication:** National 2nd Prize in English Public Speaking; USAD Bronze Medal Recipient (Speech)
- **U.S. Work Authorization:** STEM-OPT (3 years)
